(Insert date)

# is a Clean Air Action Day for ozone pollution.

Please take these steps to keep our air healthy.

### **Drive less.**

Combine errands, walk, bike, carpool or use the bus.

### **Conserve energy.**

Reduce your use of electricity.

### **Choose a different day.**

Wait until late in the day, or wait until tomorrow,  
to use solvent-based products.

### **Wait until evening.**

Use gas-powered yard equipment later in the day.  
Refuel your vehicle after 6 pm. During refueling, stop  
when the nozzle shuts off. Don't overfill or drip fuel.

Clean Air Action Days occur year-round as a public health message. Clean Air Action Days alert the public when two key air pollutants reach levels harmful to human health. On hot sunny days in the summertime, when there is little or no wind, ozone may form from the chemicals emitted by vehicle exhaust, manufacturing and other sources. Winter or summer, Clean Air Action Days also warn us when very fine particles accumulate in the air from a variety of sources.
